**Email: [info@vintageindustries.co.nz](mailto:info@vintageindustries.co.nz)**

**The packaging includes:**

1 light fixture

E27 ceramic lamp holder

2 screws for fixing

2 rubber washers

1 earth tag

## INSTALLATION OF THE LIGHT FIXTURE

### A. PLACING THE LIGHT FIXTURE ON A SUPPORT SURFACE

1. Remove the cage and the glass of the light fixture by unscrewing it
2. Using the two holes already drilled out in the back plate, screw wall feet to the wall using screws and rubber washers provided

### B. CONNECTING THE POWER SUPPLY

1. Use 3-core elastomer cable having min. 3 X 1.0 mm<sup>2</sup> cross-sectional area
2. Pass the power cable through the cable gland
3. Connect the phase and neutral conductors (brown- blue) to the lamp holder
4. Crimp your green-yellow earth wire to the earth tag and screw into place
5. With a wrench we tighten the cable gland to ensure the stability of the cable and the water tightness of the light fixture

### C. PLACING THE LAMP AND OPERATION

1. Insert bulb
2. Place the glass and the grid and screw it carefully to ensure that the light fixture will remain dry
3. Turn on the power supply to the light fixture

### **IMPORTANT**

Do not exceed the wattage (W) recommended for the light fixture.

The electric installation should take place according to existent national legalisation and standards

Add

Use 3-core elastomer cable having min. 3 X 1.0 mm<sup>2</sup> cross-sectional area
