Additional technical information regarding the product please contact: Vintage Industries

Email: info@vintageindustries.co.nz

The packaging includes:

1 light fixture

E27 ceramic lamp holder

4 screws for fixing

1 earth tag

INSTALLATION OF THE LIGHT FIXTURE

A. PLACING THE LIGHT FIXTURE ON A SUPPORT SURFACE

- 1. Remove the cap and the glass of the light fixture by removing the bolts
- 2. Unscrew nuts at back to remove back plate and screw onto surface using the screws and washers provided

B. CONNECTING THE POWER SUPPLY

- 1. Pass the power cable through the cable gland
- 2. Connect the phase and neutral conductors (brown- blue) to the connector block
- 3. Crimp your green-yellow earth wire to the earth tag and screw into place
- 4. With a wrench tighten the cable gland to ensure the stability of the cable and the water tightness of the light fixture

5. PLACING THE LAMP AND OPERATION

- 1. Insert bulb
- 2. Replace the glass and the cap and bolt back into place
- 3. Turn on the power supply to the light fixture

IMPORTANT

Do not exceed the wattage (W) recommended for the light fixture.

The electric installation should take place according to existent national legalisation and standards
