

'The Gang' Opal Glass Pendant

HOW TO CHANGE THE LIGHT BULB

These are a little tricky and may require 2 people! Always turn the light off before starting.

The Gang fittings are two plates. The bottom plate has an area cut out so you can tilt the fitting off – see instructions below:

1. Locate the cord grip and unscrew the grub screw with a small Phillips screwdriver.
2. Once the grub screw is undone, unscrew the cord grip and slide up the textile cord.
3. Lift the top plate up and using the metal thread gently tilt the base and manouvre out of the glass shade using the notched gap making sure you are holding the glass shade.
4. Once you have the lower plate out you will be able to change the bulb and put the pendant back together.

ALWAYS DOUBLE CHECK THERE ARE NO SPECS OF DUST IN THE SHADE BEFORE RE-ASSEMBLING
